Open Ended Assignment

Description:

The project was all about an e-commerce store, similar to the real Amazon store. This e-commerce store is basically designed to have the real feel of buying groceries, clothes and electrical items online. We have added the functionality of payment gateway so that any customer can feel free to pay online rather than paying in cash.

The technology stack used for the web interface is:

React (front-end), for backend we use

Node-js

Express-js

Mongo-db (database)

It is hosted on firebase further, we use real-time database of firebase where we added our different assets for our websites

For payment gateway functionality, since our website is for just testing & learning purposes we do not add the real stripe instead we use the sandbox of Stripe Api.(Credentials for it is 424242424242)

Initially we carried out tests using different methodology; For front-end we tested out manually , and for backend we use POST-MAN api for checking the behavior of the server response and making sure connection is being made properly.

The following functionalities are briefed and further tested using Katalon studio (Automated Testing). For each functionality, we added the test cases, its corresponding script , Katalon report & Screenshots :

1. Sign-up
2. Sign-in
3. Edit Profile Section
4. Adding Cart/Checkout functionality
5. Payment Functionality

For testing we use our project that was clone website of Amazon store

URL of Website : <https://clone-8affc.web.app/>

Github-url : <https://github.com/RehanMumtaz123/AmazonClone>

1.Functionality : Sign Up

Script:

```
19
20 WebUI.openBrowser('')
21
22 WebUI.navigateToUrl('https://clone-8affc.web.app/')
23
24 WebUI.click(findTestObject('Object Repository/Page_Amazon.com/span_Sign In'))
25
26 WebUI.click(findTestObject('Object Repository/Page_Amazon.com/button_Create your Amazon Account'))
27
28 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input'), 'alishba')
29
30 WebUI.click(findTestObject('Object Repository/Page_Amazon.com/button_Create your Amazon Account_1'))
31
32 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input'), '')
33
34 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input'), 'alishba80008@gmail.com')
35
36 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input1'), 'ah')
37
38 WebUI.click(findTestObject('Object Repository/Page_Amazon.com/button_Create your Amazon Account_1'))
39
40 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input'), 'alishba80008@gmail.com')
41
42 WebUI.setText(findTestObject('Object Repository/Page_Amazon.com/input1'), 'Alishba89000')
43
44 WebUI.click(findTestObject('Object Repository/Page_Amazon.com/button_Create your Amazon Account_1'))
45
46 WebUI.closeBrowser()
```
